# wi-time wall

Wi-Time wall is a Wi-Fi wall-mounted programmable thermostat, settable via Smartphone and mains-powered.

It features an e-paper screen and 3 touch buttons, which allow to control the device. All features related to the programming mode can be managed with mobile App (Android and iOS).

Comfort periods programmable on hourly and weekly basis.

Efficient energy regulation for saving and lower environmental impact.

Possibility to set and remotely control your thermostats in different comfort areas.
