## Wireless Programmable Thermostat Weekly

The **hygge Home Kit** allows the user to control the domestic heating by means of the wireless thermostat, which can be easily moved to any room. When being away from home, it is possible to monitor the internal temperature, by simply using **Seitron Smart app** on the smartphone.

Comfort periods programmable on hourly and weekly basis.

Efficient energy regulation for saving and lower environmental impact.

Possibility to set and remotely control your thermostats in different comfort areas.

## Seitron Smart

Set and control your hygge thermostats with the Seitron Smart App for Android and iOS.

- Management thermostats in different homes
- Easy navigation
- Setting of heating and cooling modes

hygge Home Kit is compatible with **amazon alexa**
